Data Sources

- **RIDDOR**: The reporting of Injuries, Diseases and Dangerous Occurrences Regulations 1995, under which workplace injuries are reported by employers and others.
- **Labour Force Survey (LFS)**: A national survey of over 50,000 households each quarter, giving estimates of self-reported work-related ill health and injuries.
- **Illustrative Estimates**: Estimates have been produced based on regional data for ill health incidence and prevalence, and NOMIS employment data at Local Authority level. They are an **illustrative estimation only**.
- **Annual Business Inquiry (ABI)**: An employer survey conducted in December each year, with a sample of around 78,000 businesses.
- **Estimated costs**: The cost estimates are in 2001/02 prices and are based on the best evidence available to us at this time, being pro-rated from the total estimated cost of workplace injuries and ill health per the 'Interim Update of the Cost to Britain of Workplace Accidents and Work-Related Ill Health' (available at: <http://www.hse.gov.uk/statistics/pdf/costs.pdf>). A research project is currently underway to update the HSE estimates of the cost of workplace injuries and work-related ill health and is due to report in 2010.
- **LAE1**: A form completed annually by Local Authorities, on a voluntary basis, providing information about LA visits and enforcement.
