

## Mission Statement

BAOHSF provides support to small to medium organisations, who do not necessarily have dedicated health and safety practitioners that the organisation may call upon.

BAOHSF keep abreast of HSE and LA initiatives and derive their seminars around those initiatives.

The seminars are planned around a mix of speakers from the Unions, Health and Safety Practitioners, Line Managers, HR and Occupational Health Practitioners with a view to getting a rounded view of the issues that each of these disciplines would address.

On some occasions the seminar could take the form of a role play around a scenario where each of the disciplines are able to describe what they could do to benefit the organisation in which that scenario is occurring.
